

# TAQA WATER SOLUTIONS TIPS: KEEP THE FLOW OF WASTEWATER NETWORKS

Together, we can find solutions for any  
wastewater network challenges.

**In your  
home**

**DO** dispose all household waste in plastic bags and place them in the bins.

**DON'T** flush any solid objects, such as fabric, down the toilet.

**DO** keep hair and soap residues out of shower drains.

**DON'T** pour cooking oils, coffee grounds or fats in the kitchen sink.

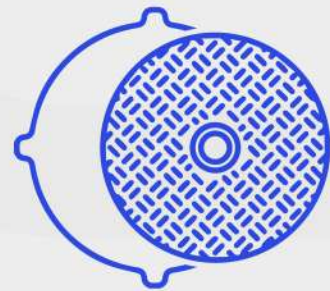

## Outside Your Home

**DO** dispose all garden waste in plastic bags and place them in designated bins.

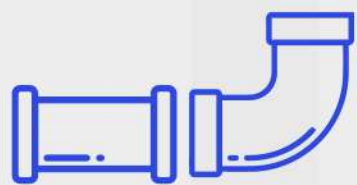

**DO** pour toxic liquids, such as petrol, in specialized drums with sealed caps and not down the sewer.

**DON'T** lift manholes, especially during rainy seasons.

**DON'T** come in direct contact with wastewater in the event of any outdoor sewage spills.

**DON'T** make temporary or unauthorized connections to the public wastewater systems.

# ABOUT TAQA WATER SOLUTIONS

TAQA Water Solutions, part of the TAQA Group, leads sustainable water management in Abu Dhabi with the capacity to treat over 1.3 million cubic meters of wastewater daily through a 13,000 km network. Founded in 2005 and rebranded in 2024, we drive innovation aligned with Abu Dhabi Vision 2030, UAE's Net Zero by 2050, and the UN SDGs. Our strategic growth plan includes enhancing infrastructure with new treatment plants in Abu Dhabi, Al Ain, and the Western Region to support communities, foster a circular economy for water, and achieve global recognition.

If you face any wastewater related issues,
